Climate Finance Provided and Mobilised by Developed Countries: Aggregate Trends Updated with 2019 Data

|

Description / Abstract

This report presents aggregate trends of annual climate finance provided and mobilised by developed countries for developing countries for the period 2013-19. The trends are presented by finance source, climate theme and sector, geography, and financial instrument. As this report is intended as a short technical update to the previously published 2013-18 figures, the information provided remains at an aggregate level. An expanded and disaggregated analysis will be conducted in 2022 for climate finance in 2019 and 2020, once data for 2020 is available.
